

# ABOUT US

## The Hedwin Division of Zacros America

**As a trusted producer of innovative packaging solutions, we leverage a proud legacy of expertise in plastics processing. Our products are extremely durable, cost effective, environmentally friendly, and relevant to a wide range of applications.**

### WHAT WE DO:

- ◆ Our flagship product is the one-and-only patented CUBITAINER® - a flexible bladder which offers significant performance, environmental and cost-saving advantages over traditional alternatives for storage, transport, and dispensing of liquid, viscous and granular materials. Behind every CUBE® is a diverse group of people working around the clock to produce the best flexible package on the market.

### THE ZACROS HEDWIN DIFFERENCE:

- ◆ Patented products and manufacturing processes for over 70 years
- ◆ Proprietary resin blends offer superior leak tightness, puncture resistance, and broad chemical compatibility
- ◆ Complete vertical integration: we manufacture our components, molds and tooling for TOTAL quality control
- ◆ Wide variety of product options to allow total customization

### OUR OWNERSHIP:

- ◆ The Hedwin Division of Zacros America was formed in 2014 when Fujimori Kogyo Co. Ltd. purchased the assets of the former Hedwin Corporation, which had been founded in 1946. The business is now part of Fujimori's wholly-owned subsidiary, Zacros America, Inc.
- ◆ Fujimori Kogyo, a large Japanese firm, has interests globally, involving optoelectronics, electronics, medical/pharmaceutical devices, printing, construction materials, and flexible packaging.

### Markets Served

**HDZA products are trusted every day, all over the world, in a wide variety of applications.**

Customers who rely on our products are in diverse industries like:

*Biologics/Reagents*

*Pharmaceuticals*

*Paints/Colorants/Inks*

*Industrial Chemicals*

*Spirits/Beverages*

*Foods/Flavorings*

*Asphalt Coatings*

*Lubricants/Oils*

*Powders*

*Cosmetics*

*Adhesives/Sealants*

*Soaps*

*Sanitation/Janitorial*

### - MISSION -

The Hedwin Division of Zacros America shapes a more sustainable society by manufacturing unique plastic packaging and innovative solutions for a variety of customer applications.

### - VISION -

The Hedwin Division of Zacros America leverages a proud legacy of expertise in plastics processing to supply products that are extremely durable, environmentally friendly, cost effective and relevant to a wide range of applications.

We deliver QUALITY to our customers, not just products. This is achieved through teamwork, diversity and a systematic problem-solving approach to ensure continuous improvement and customer satisfaction.

### - QUALITY POLICY -

We strive to supply sustainable flexible packaging solutions that support environmental stewardship and exceed our customers' requirements in diverse applications. We continually improve our products, processes and quality management system to support this effort, while bringing a high level of satisfaction to our customers around the world.

### - HISTORY -

Our roots as pioneers in the field of packaging and plastics processing stretch back more than 70 years. In 1946, Thomas W. Winstead joined with Lenox Burkhead to form the Hedwin Corporation in Baltimore, Maryland. The company began producing various plastic bottles and vessels. Ten years of hard work came together in 1956 when Winstead filed patent applications for new products and manufacturing processes which forever changed the packaging industry. These were among the earliest use of plastics for packaging in the US, and would continually evolve to become today's CUBITAINER®, and Assembled CUBITAINER®.
